

Control Systems

A comprehensive design, manufacture and installation of control systems is available. Ranging from simple cable control to sophisticated pneumatic or electric actuation. Both electrical and pneumatic operation can be linked to a fire alarm, sprinkler, smoke detection or BMS system.

Smoke Curtains

Where there is a need to restrict the lateral spread of smoke and hot gases. A range of static or retractable smoke curtains is provided. Each curtain is custom made for each project.

Pressurisation Systems

Airvent Systems Ltd provide a full design, installation, testing and commissioning, service for a diverse range of projects.
